

## **Silvopasture**

### **Description**

Silvopasture integrates trees, shrubs and compatible forages on the same land.

### **Benefits**

- Provides forage, shade, and shelter for livestock.
- Shaded, cool season forage plants can be more nutritious for livestock.
- Improves water and soil quality; reduces soil erosion.
- Increases plant nutrient uptake efficiencies.
- Increases carbon sequestration and storage.
- Enhances wildlife habitat and improves biological diversity.
- Improves the value of timber products.
